

## **VERVE EMPOWERMENT MILESTONE**

At Verve we are great believers in the attainment of Vision 2030, before 2030. Our commitment to the growth and development of Kenya and Africa as a whole is represented through our staff. We are a people centric organization, as we grow, so do they, walking with the firm every step of the way developing skills, and empowering them to higher levels of service.

In line with this, verve has recently deployed 47 Junior Training Associates to each of the 47 counties to assist in the deployment and roll out of the Oracle Plan to Budget system, which is one of the major modules under the Intergrated financial management information system (IFMIS) of the Government of Kenya

Sourced directly from the individual counties, the associates have gone through our thorough In-house training program. They are thus well equipped to provide support services to the finance and budget officers deployed at the counties.

To-date more than 400 junior associates have passed through verve training and internship program, 65 of them securing permanent employment at verve, while the others going on to deliver excellent services to other major organization in the region. We will continuously strive to create more employment opportunities for the young people in our country.
